

graphsats::StateSet  
< UINT >::add

graphsats::StateSet  
< UINT >::contain

graphsats::StateSet  
::containBody

```
graph LR; A[graphsats::StateSet< UINT >::add] --> C[graphsats::StateSet::containBody]; B[graphsats::StateSet< UINT >::contain] --> C;
```

The diagram illustrates a relationship between three function signatures. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'graphsats::StateSet < UINT >::add' and the bottom box contains 'graphsats::StateSet < UINT >::contain'. On the right, a gray rectangular box contains the text 'graphsats::StateSet ::containBody'. Two blue arrows originate from the right side of the top and bottom boxes on the left and point towards the left side of the gray box on the right, indicating that both functions on the left are related to or point to the function on the right.
